Experience

GLSoft   **May 2024 - Present**
Software Engineer   Remote

- **Developed and maintained a Seller Center** for a large-scale international e-commerce Seller Center using Next.js, React, and TypeScript in an Agile environment.

- **Built key features for the Product & Order module**, optimizing image assets, including API route optimization and security handling.

- **Engineered a Promotion Module from the ground up**, including rule validation and API services, reducing manual inputs and improving operational accuracy.

- **Collaborated with international backend, design, and PM teams** via GitHub and Jira to streamline workflows and reduce handoff delays.

Multiple B2B SaaS Companies (2013–2024)   **2013 - May 2024**
Senior Sales Manager / Product Manager   Taipei, Taiwan

Leveraged a decade of experience in product management and sales to drive global market expansion, manage full product lifecycles, and deliver customized SaaS & AI solutions for enterprise clients in the retail and QSR sectors.

Side Projects

VideoSummarizer   **May 2025 - Present**
A responsive web app that collects and translates YouTube video subtitles, generates summaries, and enables interactive discussion with a long-term memory chatbot.
