Summary

A UI/UX Designer with hands-on experience in designing AI Platforms for various users. With a strong foundation in visual design, I value accessibility, usability, and intentional design.

Experience

Huemn Interactives

January - July 2025

UX Designer

Hyderabad

At Huemn, I led end-to-end design UI/UX, while assisting on research and building first-draft front-end prototypes using no-code tools like Framer, Lovable. Collaborated with developers and AI engineers to deliver accessible, visually pleasing, and user-friendly product experience.

UI Designer

2023-2024

Freelance

Collaborated with clients to design intuitive onboarding UI, Landing Pages, Specific Screens delivering High-fidelity Prototypes with A/B testing and iterations based on user feedback.

Brand Identity Designer

2020-2022

Freelance

Partnered with handful of clients, increasing their users by 30% improving the brand identity of 15+ local businesses. And continued to sell illustrations through personal branding on Freepik.

Education

GIET University

2022 - 2024

Master of Business Administration

Projects

Task Management System

Designed a task management system for early startups reducing their task completion time by 20%.

AI Powered Gallery Platform

Designed a gallery platform for creators to seamlessly share pictures with face recognition.
